

methodological hierarchy for degenerate quantum eigenspaces

1D excited states	P	P	S	NA	NA
square degeneracy	F	P	P	S	NA
rectangle splitting	NT	NT	P	S	NA
disk $m=1$ doublet	NT	P	P	S	NA
ellipse splitting	NT	F	F	P	S
	residual PINN	orthogonality penalty	orthogonal projection	subspace Ritz	symmetry sectors
	success	partial/unstable	failure	not run/missing	not applicable
